WORK EXPERIENCE

Business Analyst – Osmos.ai, Pune

Jun 2025 – Jul 2026

- Analyzed advertising campaign performance across 40+ retail media marketplaces, performing end-to-end root cause analysis across campaign KPIs and funnel metrics to **resolve 20+ performance investigations weekly**.
- Collaborated with Product, Performance & Business stakeholders to investigate campaign performance issues, perform **end-to-end root cause analysis** & recommend business solutions using Google BigQuery, Python.
- Gathered reporting requirements from business stakeholders and **developed automated Excel and BI dashboards** to improve campaign visibility and decision-making. This also allowed us to improve campaign performance and support data-driven decisions, contributing to a **15% increase in reporting efficiency**.
- Designed and automated the **end-to-end weekly marketplace performance newsletter**, reducing manual reporting effort by **2–3 hours per week** while delivering actionable insights to **50+ stakeholders** across Product, Performance and Business teams.
- Documented and reported requirements, business workflows and functional expectations while collaborating with Product and Business stakeholders.

MIS Analyst – NG Rathi Investraders Pvt Ltd, Pune

Aug 2022 – Jul 2023

- Consolidated fragmented sales and CRM data into a unified Power BI dashboard, reducing manual reporting effort by 60%
- Built variance reports highlighting underperforming investment products and collection delays, enabling faster pricing and sales decisions.
- Eliminated reporting issues by standardizing KPI definitions & data validation across business functions.

Software Engineer- Harbinger Systems, Pune

Jul 2020 – Jul 2022

- Analyzed proposed technical solutions based on customer requirements.
- Collaborated with business stakeholders to analyze customer requirements and translate functional needs into software solutions supporting enterprise applications.
- Designed and executed performance testing for multiple applications to ensure optimal performance.
- Monitored resolution of bugs, tested fixes and helped developers tackle ongoing problems by providing QA perspective.

KEY PROJECTS ([Visit my Portfolio](#))

- **Data science job analysis market (Business Intelligence)** – Designed intuitive dashboards by importing datasets for data science professionals, offering insights on optimal job markets, company sizes, global prospects, experience requirements, employment types, and average salaries using reporting tools.
- **Car insurance - fraud detection** – Using Python, implemented fraud detection models on car insurance data set with accuracy of 94% using neural networks and performed basic ETL, EDA techniques so as to make data consistent to perform data modeling techniques.
